

Superb service, product quality and the pursuit of innovative design

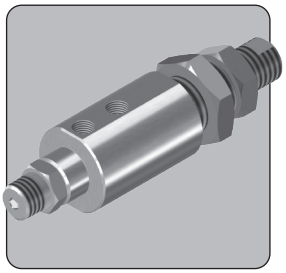

Pressure Sensing
Overview

Benefits Checklist

Pneumatic pilot signal triggered by a separate sensed pressure.

Stainless steel construction.

Adjustable sensing point with seal and port options.

Sensing valves Pages ??-??

Function

Sends a pneumatic pilot signal when a sensed pressure rises above or falls below a preset point.

Key features

Pressure sensing valves, stainless steel construction. Primarily used to send a pneumatic pilot signal to actuate another valve when the state of a sensed service rises or falls beyond a pre-determined pressure. Various sensing pressures, port and seal options available.

3SV25: 3/8" and 1/2" ports; sensed pressure to 414 bar (6,000 psi) with liquids or gases.

Applications

Sequence and safety interlocks, wellhead and process panels where a second service must switch a pilot-operated valve.

	Nominal Size	Pressure	Media	Valve Type	Page
Sensing valves	3/8", 1/2"	414 bar (6,000 psi)	Liquids & Gases	3SV25	?
