

Superb service, product quality and the pursuit of innovative design

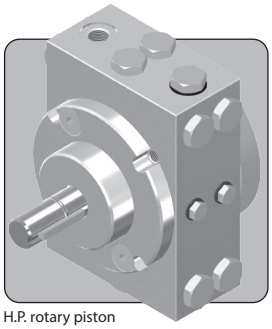

Pumps
Overview

Benefits Checklist

Low-flow, high-pressure radial piston pumps.

Pressures up to 828 bar (12,000 psi).

Compact 260PR and 520PR types.

H.P. rotary piston pumps Pages ??-??

Function

High-pressure radial piston pumps for generating high pressure at low flow.

Key features

High pressure radial piston pumps, primarily carbon steel construction. Ideally suited for high pressure low flow applications, such as maintaining pressure in accumulator banks. Suitable for use with mineral oils, but may be used with certain water glycols (contact factory).

Applications

Accumulator charging, high-pressure test and laboratory systems, and other low-flow high-pressure duties.
